EDUCATION

Parul Institute Of Technology, Parul University — Vadodara
Bachelor of Technology in Artificial Intelligence — June 2020 - Present
CGPA: 7.20

EXPERIENCE

SAP Code Unnati Program I SAP Internship Trainee — Vadodara I Aug 2022 - March 2023

1. Worked on foundational skills for Industry 4.0.
2. Acquired knowledge of Internet of Things for Artificial Intelligence.
3. Implemented Machine Learning Algorithms.
4. Explored Computer Vision and Edge Computing using OpenVINO Toolkit.

SAP Code Unnati Program I SAP Intern — Remote I Feb 2023 - May 2023

1. Worked on relevant practical projects on emerging technologies like AI, ML, IoT, Cloud Computing, Cyber Security and Blockchain under the SAP Code Unnati Program.
2. Completed the project under mentoring from experts of Edunet Foundation and Code Unnati.
3. Submitted the project synopsis and detailed report within the stipulated timeline.
4. I have done "Smartphone Price Range Predictor" project under the guidance of mentor.
5. This internship program was conducted in collaboration with the Edunet Foundation and All India Council for Technical Education AICTE).

UniConverge Technologies I Data Science & Machine Learning Intern — Remote I Jul 2023 - Present

Data Science & Machine Learning Intern with a solid academic background and proficiency in Python, machine learning algorithms, and data analysis. Seeking an internship opportunity to gain practical experience, apply theoretical knowledge, and contribute to real-world projects. Eager to enhance skills in data-driven decision-making, problem-solving, and collaborate with a dynamic team of professionals.

SKILLS

Programming Languages:	Python, C
Libraries/Frameworks:	NumPy, Pandas, Matplotlib, OpenCV, OOPS, DSA, AI, ML Algorithms, TensorFlow
Tools / Platforms:	Visual Studio Code, Google Colab, Jupyter Notebook
Databases:	SQL

PROJECTS

Computer Aided Melanoma Skin Cancer Detection.

Python, Feature Extraction, Image Processing, Deep Learning, Machine Learning, TensorFlow

Aided melanoma skin cancer detection system leverages the power of artificial intelligence and image analysis to provide accurate and efficient diagnosis of melanoma, a deadly form of skin cancer. By combining advanced machine learning algorithms, our system aims to revolutionize early detection and improve patient outcomes.

Smartphone Price Range Predictor I Link

Python, Machine Learning, Data Visualization, Data Analytics, NumPy, Pandas, Matplotlib, TensorFlow

This is a machine learning model to predict the price and defining the price category of smartphones based on its specifications and market analysis.

This project can be beneficial to various smartphone companies and startups to define price and price category of newly built smartphones based on market analysis.
